*Engineered to Respond*

## ENVIRONMENTAL PROTECTION SERVICES

## Oil & HNS Spill Response Services

### Incident response

EPE S.A., operating more than fifty antipollution stations in Greece, Albania, Cyprus and Iraq, is able to offer worldwide emergency response services for:

- Collection of oil at sea
- Coast cleaning on all terrains
- Ship-to-ship or ship-to-shore transfer
- Pumping of fuels and cargo from sunken or grounded vessels
- Environmental protection services during salvage operations
- Remediation and handling of contaminated or destroyed cargoes
- Wreck removal
- Oil waste disposal
- Hazardous and Noxious substances (HNS) response

### EPE Fleet - Equipment

- Skimmer-Vessels
- Antipollution Response Vessels
- Antipollution equipment
- High capacity pumping equipment for crude oils and all kinds of oil products.
- Temporary storage devices
- Offshore Support Vessel (MRV AEGIS I) fully equipped with antipollution equipment

## Protection & Preparedness

**Services** proposed by EPE as part of Marine Environment Protection Contracts aiming to secure preparedness for our clients. These services include:

### Development of Oil Spill Contingency Plans

Having developed numerous Contingency Plans, EPE's scientific personnel is capable to offer cost-effective and sustainable solutions for any facility.

### Provision and regular inspection of antipollution equipment

EPE can provide antipollution equipment and means permanently stored in your facility with regular inspections that will ensure its adequacy and good condition.

### Antipollution Drills & Exercises

Planning and execution of drills on a regular basis, enable each company to optimize the response time during an emergency, practice prevention methods and ensure the operational preparedness of the facility.

### 24/7 emergency response services (personnel & equipment)

EPE may mobilize specialized scientific and technical staff, equipment and means from antipollution stations all over Greece as well as in Cyprus, a fleet of AKTEA Skimmer-Vessels and Multi-Role Vessel AEGIS I for the immediate response to every incident in any place.

### Oil Spill Response Training

Our specialized personnel deliver high quality training oil spill response courses, both theoretical and practical, providing the necessary response level in state of emergency.

### Equipment Sales

By manufacturing oil booms, EPE continues its successful course in the development and production of antipollution equipment and means, having all the required approvals and certifications.

### Our products:

- Antipollution oil booms
- Sorbent materials
- Skimmers
- Oil Spill dispersants
- Fenders
- Hand tools and PPE

### Rental of equipment

During ship-to-ship/ ship-to-shore transfer bunkering projects or elsewhere required, EPE is able to provide equipment rental services (oil booms, pumps, hoses, fenders etc). The projects are supported by our highly trained personnel who are responsible for organizing and completing these operations, in the most professional way.

## Training Services

### Oil and HNS Pollution, Preparedness, Response and Co-operation Courses

Environmental Protection Engineering S.A.'s training courses is a combination of both theoretical and practical courses and meets the requirements set by the International Convention on Oil Pollution Preparedness Response and Co-operation 1990 (OPRC Convention) and the OPRC HNS Protocol 2000.

The courses can be delivered in EPE's modern Training Center in the Industrial Park of Schisto or in the facilities of your choice. Additionally, our company offers you the possibility of delivering the courses in two languages (Greek and English). All EPE's activities including our training services are certified according to ISO 9001:2008.

### List of available training courses:

IMO Level 1 - First Responders  
 IMO Level 2 - On Scene Commanders  
 IMO Level 3 - Spill Management  
 Oil Spill Awareness Course  
 HNS Spill Awareness Course  
 Introduction to Marine HNS Response at Operational Level  
 Introduction to Marine Spill Response for Shipping Industry

## Damaged and Distressed Cargo Services

"Distressed cargo" is cargo that failed to reach its destination in time or in the expected condition, resulting in its deterioration and possible abandonment.

Where a cargo has been unable to reach its destination due to a casualty, EPE will find a tailor-made solution. EPE's experts will survey the cargo and will propose to Cargo Carriers, Shipowners, Marine Salvage companies and Insurance Companies, the best practice which will maximize the value of recoverable assets.

### Our services

- Survey and inspection of Hazardous and Non-Hazardous cargo
- Recovery of cargoes (offshore and onshore)
- Repacking cargo
- Labelling cargo
- Decontamination and disposal of distress cargo
- Pollution prevention measures
- Ship-to-ship (STS) services

#### **Environmental Protection Engineering S.A.**

EPE was established in Piraeus in 1977, offering complete services regarding the response to oil and chemical spills and the protection of the marine environment. EPE has successfully responded to thousands of pollution incidents during the last three decades with state-of-the-art equipment and highly trained personnel. We provide services to all kinds of onshore and offshore facilities including oil terminals, refineries, shipyards, recycling yards, pipelines, power stations, industries, ports and marinas, in accordance with the relevant legislation. EPE has earned an excellent reputation among the maritime sector in the Mediterranean, the public authorities and the large private companies. Since 2007 and after participating in international tenders, EPE maintains a contract with EMSA, providing the readiness and availability of antipollution Tanker Ship «AKTEA OSRV» based in Greece. The vessel can be mobilized to face major pollution disasters following EMSA's instructions. In 2014 VSS-EPE Environmental Protection Services Ltd (VSS-EPE) was founded in Cyprus, after the cooperation agreement between Environmental Protection Engineering S.A. and Vasiliko Sludge Services Ltd. VSS-EPE has established a large antipollution Base in Vasilikos port with a capable inventory of antipollution equipment, vessels and experienced and trained personnel.
